

Registration due December 16, 2016

Coding
Wednesdays
January 11 - April 5

Student Enrollment Information:

Parent Name Phone: Email:
Student Name: Grade: Current School:
Classroom Teacher: Email: Date:

Coding:

Coding is the way we tell computers what to do. Learning to code empowers you to learn logical skills and problem solving. These skills can help you hand-craft your own websites, become a career coder or even starting a technology business. Most importantly, you'll be able to understand the technology shaping your world. In this weekly class, you will be working on both computer and hands-on activities that require you to create various directions and commands, collaborate with peers, and solve puzzles to pass through the levels. Whether you're looking for a future career in the industry, starting a new hobby or just wanting to understand technology, you can benefit from this weekly class!

Location: O'Gorman Junior High Computer Lab on Wednesdays from 3:30-5:00, January 11-April 5, 2017

Coding: Minimum enrollment of 8 students

Payment must be attached to registration form.

Coding at the Junior High: \$150

V. Signatures Required:
