Engineering 101 for grades 1-3: Your budding engineer will bring creations to life that specialize in forces and motion like driving, cranking, walking, spinning, flexing, reeling or lifting.

Engineering 201 for grades 4-6: Using theme based programs, students will discover how to create cool machines and design superstructures. Engaging hands-on projects building complex models with K'NEX pieces. Students will explore engineering concepts such as designing, testing and redesigning through experimenting and problem solving skills that encourages teamwork, critical thinking skills and an early love for STEM.

Please indicate preferred location and class: This class will be held one day per week for six weeks.
